REGULATORY COMPLIANCE SERIES

GHS for Hazard Communication

**Monday, March 13, 2017, or Friday, June 23, 2017, or
Friday, October 20, 2017, or Tuesday, December 7, 2017**

1:00 pm – 5:00 pm

Newly revised to incorporate the GHS standard, this course is a must for any organization with hazardous materials.

OSHA's recently released Hazard Communication Standard updates the 25-year-old regulation by incorporating the United Nations' Globally Harmonized System of Classification and Labeling of Chemicals, a system many stakeholders suggest will make it easier to classify and communicate hazards.

OSHA implemented the Hazard Communication Standard (HCS) to help employers and employees protect themselves from chemical hazards, and reduce the incidence of related illnesses and injuries.

The seminar covers:

- GHS and the new Safety Data Sheet system
- OSHA Hazard Communication 1910.1200 Subpart Z
- Hazard communication programs
- Labeling hazardous materials
- And much more

GHS Deadlines as per OSHA 1910:

12/1/13 – Train all employees on the new label elements and Safety Data Sheet format.

6/1/15 – Comply with all modified provisions of the rule, except distributors that are allowed to ship products labeled by manufacturers under the old system until 12/1/15.

12/1/15 – Comply with all modified provisions of the rule.

6/1/16 – Update alternative workplace labeling and hazard communication programs as necessary and provide additional employee training for newly identified physical or health hazards.

4-hour course

Member \$99* per person / Non-member \$135* per person

Advanced registration required. Please visit our website or call for details.

*Based on payment received at least 10 days prior to class. Late registration fee applies thereafter. Visit www.metro-safety.org for more information about the NSC Certificate in OSHA Compliance.
