Construction Fall Protection Train-the-Trainer

**Tuesday 4/10/18 or
Friday 7/20/18 or
Friday 10/26/18**

1:00 pm – 5:00 pm

With the exception of motor vehicle crashes, falls are the single biggest cause of occupational death and injury in the United States. According to the National Safety Council, hundreds of workers die each year from injuries caused by falls.

Falls pose a particularly severe hazard in the construction industry, accounting for the greatest number of deaths year after year. The Occupational Safety and Health Administration (OSHA) reports that approximately one-third of all deaths are due to falls. OSHA has established a revised standard on fall protection, Subpart M, which covers the construction industry.

The fee for this class includes the **complete training kit** for Construction Fall Protection:

- How to comply with the OSHA standard
- How to develop a written program
- How to train employees, including an instructor guide, DVD, PPT, test, and description of the optional hands-on demonstration and practice
- Choice of English or Spanish kit
- A \$495 value!

During the Train-the-Trainer, you will learn how to effectively use the training material to meet or exceed the OSHA standard.

4-hour course

Fee*: Member \$449 / Non-member \$585 per person

Additional attendees from the same organization (no kit): \$50 / \$65 per person.

Advanced registration required. Please visit our website or call for details.

*Based on payment received at least 10 days prior to class.

Visit www.metro-safety.org for more information about the NSC safety training.
