

METROPOLITAN SAFETY COUNCIL, INC.

Powered Industrial Trucks

4-Hour Course

Lift, carry, stack -- and comply. Here's why. OSHA's safety training requirements for powered industrial truck operators help prevent an estimated 11 deaths and 9,500 injuries per year, plus \$135 million in employee costs. What can they do for your facility?

The National Safety Council's Powered Industrial Trucks Training Seminar lays it all out for you. Our professional facilitator will walk you through the standard and show you how to put it to use. Through discussion and activities, you'll learn practices and procedures that will help you comply and keep your employees safe.

The four-hour seminar covers:

- Details of the OSHA Powered Industrial Trucks standard CFR 1910.178 Subpart N
- Basic safety precautions for operators and those working in the vicinity
- Operating forklifts and other powered industrial trucks in hazardous locations
- Training requirements for operators
- Maintenance, including safe fuel handling and storage
- Includes student workbook and certificate of completion

At the end of the seminar, you'll be able to:

- List the key elements of the regulations and how to comply
- Describe proper operating and maintenance techniques that prevent injuries
- Identify what kind of training you need to provide, and for whom
- Describe how compliance can reduce your workers' comp and other costs

Fee: \$125 per person. Advanced registration required. Some restrictions apply.

Special Offer: Also enroll in our Lift Truck Operator Train-the-Trainer (LTOTTT) on the same day for ½ off PIT! When taken with LTOTTT, pay only \$62.50 for PIT. Offer expires 12/31/23.
